

Project Proposal

Title:

Online Food Ordering & Reservation System

Contact:

Name: Group 9

Members: Mingwei Sui, Zhikai Lin, Hongliang Gao

Proposal idea:

Our project is dedicated to help the restaurant coordinating their daily activities including maintaining its food product information, seats availability, managing its orders and tracking its business growth etc. It also enables customers to place orders, reserve tables online and track order status for them.

Objectives:

1. Minimize the amount of time of ordering
2. Track status of order delivery
3. Make seat reservation online
4. Improve customer satisfaction
5. Restaurant can manage their order more efficiently

Users:

Customers, Restaurant staff

Impact:

Customers can easily place an order online and reserve a table before they arrive while the restaurant can manage its orders and assign its resource more effectively.

Budget:

\$40500 = 90 days * 3 hours/day * 3 members * \$50/hour
